

# GRADE 9: ECOGRAM

Students of Grade 9 decided to spread awareness about endangered animals and species through artwork and sketches.

# IBDP: ECOGRAM

Our students have taken on the responsibility of educating the children in Lakhania village in English and Maths as they understand the importance of education. This activity enables these children to prosper academically as well as strengthens relationships between our students and the village students.

Our students also organized a medical camp in Lakhania village, Bhuj, providing healthcare services to the underprivileged. Alongside the camp, they conducted awareness sessions on health and hygiene, empowering the community with valuable knowledge for a healthier future.
