

# GRADE 1: WAR AGAINST WASTE

The students from grade 1 made a strong connection with our year long Ecotopia club, War Against Waste. We did that through celebrations such as Ganesh Chaturthi, Dussehra, World Literacy Month. Some students from our class have taken initiative to create 'best out of waste'

- For celebrating the World Literacy Month- Nirvaan was dressed up as one of the story character's and he created that dress out of a plastic bag.
- Jasmyra created Ganesha and Dussehra idols using the waste materials.

# GRADE 3: WAR AGAINST WASTE

Students watched various videos on things that are wasted around the world. They had a brainstorming session on solutions to waste these things. They came up with solutions like melting old crayons to make new ones using moulds, using leftover water from water bottles to give to plants, separating dry and wet waste, creating a comic strip to create awareness, using leftover coloured paper to make a pen holder, visual representation of how a clean plate should look vs leftover food plate.

Students take action against waste. They took the initiative to reuse different materials creatively and sustainably. These small actions not only contribute to waste reduction but also empower students to be agents of positive change in their environment.

# IBDP: WAR AGAINST WASTE

As part of an experimental task, our sustainability club with an emphasis on sustainability collected used crayons, melted them down, and made brand-new, colourful crayons. This creativity project not only reduced waste but also made recycling and upcycling more important.

In collaboration with the 'Welfare for Strays,' our students showed their love and concern for animals by making recycled rag toys for stray animals. This initiative promotes a sense of responsibility for the wellbeing of all living things and demonstrates our enduring commitment to animal care.
